If your AGA is well-used & well-loved and you don't want to part with it, we can convert your oil-fired AGA to electric in one day.

CONVERT YOUR OIL-FIRED AGA COOKER TO 13 AMP ELECTRIC

- Control over the temperature in your kitchen
- Enjoy lower settings in the summer
- Switch the Aga off when you go on holiday
-

We offer 13-amp conversion for your oil-fired Aga. We will complete the conversion on-site within the day.

You can benefit you allowing controllable warmth to your kitchen, lower heat settings for use in the summer, switch your AGA off or turn to very low when you are away on holiday.

What are the benefits of Converting an Oil Aga to Run on 13amp Electric?

Let's keep this simple...

- Lower fuel costs. MUCH lower in some cases especially compared to LPG and Oil.
- Zero servicing costs.
- That Dreaded smell of oil is eliminated, especially in eastly winds
- Dramatically reduced heat loss up the chimney

That Ever -reducing service interval and increased cost is now a thing of the past

No more 6 monthly visits from the oil man!

- No Chimney sweeping
- Oil agas are beginning to carbon up more regular than ever with the low carbon fuel issues
- Zero infrastructure costs.
- No oil tanks, lines or flues required
- Lower fire risk. No flames or flammable fuels in your house
- Zero carbon monoxide risk.
- No combustion in your kitchen!

Easier to use.

- No more soggy potatoes as the ovens cool down during the roast!
- Safer Holiday Home or you're away a lot, safer and far more controllable}
- Zero fuel leak risk. No oil lines, gas pipes, valves or taps
- Cheaper Insurance {especially if you have a thatched property}
- Solar or Wind Power could eventually power your aga cooker.

Aga Owners Know an Aga

Cooks superbly

Looks fantastic – a stunning focal point in any home warms your kitchen and beyond

Provides constant, gentle warmth – driving away damp chills in your home

Largely replaces small appliances such as kettles, toasters and microwaves

Airs your clothes which in turn eliminates endless tumble drying

Acts as a magnet for your family and friends

Makes sense financially

Even since 1936 aga were environmentally responsible – making agas from scrap iron,

agas have a very long life, is recyclable, and avoids the need to buy as much as £5000 of small appliances over the life of the Aga

In a Nutshell – Its Cleaner and by far Greener
